Clarification: All concrete and concrete aggregates for use in both Phase I and Phase II of this project shall conform to Specification Section 03301. Each technical specification section contains specific application requirements which shall remain in effect. All concrete required by the project shall be produced using Burlington lime stone. The total aggregate in the concrete mixtures shall consist of at least 50 percent crushed Burlington lime stone. All aggregate sources proposed for use, Burlington and other shall demonstrate that it conforms to the aggregate requirements specified in section 03301. There are no pre-approved aggregate sources. The Contractor shall be responsible for all concrete and aggregate testing. All Contractor testing for concrete and aggregate shall be accomplished by an approved independent commercial testing laboratory. The Contractor shall furnish concrete and aggregate samples as specified, for Government verification testing. Government verification testing of concrete and aggregates shall not relieve the Contractor of the responsibility for providing materials conforming to the specified requirements. Aggregate test reports accomplished within the previous 6 months prior to the submittal date for the source and specific geological unit or ledge proposed for use may be accepted provided the testing conforms to the specified requirements and was accomplished by an approved independent commercial testing laboratory.
